REQUESTS FOR HLA B27

Dear Doctor,

The reference laboratory that we refer HLA B27 testing to has temporally suspended testing for this analyte.

We will be referring these tests to another laboratory until further notice.

The specimen requirement is for a 10 ml ACD tube (shipped the same day between 4°C and room temperature).

Please complete the enclosed requisition and forward to Alpha Laboratories with the sample.

Please note samples for HLA B27 are accepted at Alpha Laboratories only from Monday to Wednesday 9:00 am – 5:00 pm.

Sincerely,

Robert Cheslo-Trengrove
Quality Manager
Alpha Laboratories
