

NOTICE TO PHYSICIANS

July 16th 2014

Thyroid Receptor Ab (TRAB) and Thyrotropin Binding Inhibitory Immunoglobulin (TBII) test services

Dear Doctor,

Thyroid Receptor Ab (TRAB) is still available as a non-OHIP billable price of \$65.00.

Our referral lab has recently added Thyrotropin Binding Inhibitory Immunoglobulin to their test menu.

In the past order for Thyrotropin Binding Inhibitory Immunoglobulin (TBII) and Long Acting Thyroid Stimulating Hormone (LATS) have been processed as orders for Thyroid Receptor Antibody (TRAB) since it was the only assay available.

Effective July 21, 2014 orders for TBII and LATS will be processed as TBII a non-OHIP billable price of \$46.00 and will be reported in units of % inhibition.

Sincerely,

Robert Cheslo-Trengrove
Quality Manager
